

IT Healthcheck

IT Healthcheck Ensuring your IT infrastructure is fit for purpose...

At the lowest level, our consultancy services start with a FREE, without obligation, IT Healthcheck. We start by understanding your business first, analysing your needs and then making appropriate recommendations. This service provides a snapshot of the technology currently in use in your business and will include:

- PC specification and performance check
- Evaluation of existing network
- Audit of hardware
- Audit of software
- PC enhancement checklist
- Written report with our findings and conclusions
