## iSales PDA

### PDA sales automation for ERP...

iSales from Integrous is designed for organisations that wish to utilise Personal Digital Assistants (PDAs) to organize their sales network. It enables sales personnel to fulfill most of their daily tasks when visiting customers, providing order entry, enquiries, invoicing, collections and merchandising information as well as much more.

iSales PDA presents access to key information such as order history, stock, sales and other statistics, making the end-to-end sales process extremely efficient. iSales PDA is the total solution in the field of mobile wireless applications and offers numerous benefits and advantages for any organization that operates a remote sales team. iSales PDA can be seamlessly integrated with virtually any ERP system. One of the most important technological innovations of iSales PDA is that of data replication - synchronisation enables sales personnel to connect to the ERP at any time to send and receive all relevant sales information virtually instantly. Key Business Benefits: Direct Order Entry &ndash; Reduced shipping and delivery times and increased customer satisfaction.

Efficient Stock Management &ndash; Sales personnel can check stock at any time from any location, thus improving order fulfillment.

Information Gathering at the Point of Sale &ndash; Vital sales metrics captured in real time for more efficient sales administration.

Improved Customer Management &ndash; Instant access to key customer information improves the likelihood of conversion and enhances the customer experience at the point of sale.
